Diversicus is a circus. There are acrobats and clowns, but there aren't any animals. The acrobats get up at half past six and they have breakfast early because they start practising at nine o'clock. Acrobats have to climb, run and jump. The strong acrobats catch the others in the air. It's very exciting. Their job is beautiful, but it's dangerous, too.

Balancing act

Watch the video.

Listen and read. Answer the question.

Can you ride a bike? Do you like ice skating or doing gymnastics? When you do these activities what helps you not to fall all the time? It's your sense of balance. Your brain controls your sense of balance. The brain is a very complicated organ. Different parts control different things. The cerebellum is the part of the brain that controls balance. Without this, it would be difficult to walk or even stand up.

Which other activities need a sense of balance?
