How to Use This Book

Ebridge Phonics is designed to be a fun and easy way to learn phonics. Full of chants, activities, stickers, coloring, stories, and games, the series will enchant young learners and make their important first experiences with English exciting and enjoyable.

Student Book

Each book in the series is divided into four Parts, each focusing on a different set of sounds. These sounds are chosen to help students easily understand the differences between them. Through the five units in each Part, the sounds are introduced and thoroughly practiced, both in isolation and within common words in which they appear. Students get practice with these sounds in the context of speaking, listening, reading, and writing in a wide variety of different activities to keep learning interesting.

UNIT 1 introduces all the letter-sound combinations for the Part and some common words in which they appear. Students learn how to form the letters and are introduced to words featuring the key sounds through craft activities and a game.

UNIT 2 & 3 focus on each letter-sound combination separately and common words they appear in. Chants and activities review and reinforce the material introduced in the first unit, and expand on it with practice in distinguishing the forms and sounds of the letter-sound combinations.

UNIT 4 & 5 are dedicated to reviewing and consolidating learning. Through fun activities, puzzles, and games, students practice distinguishing the letter-sound combinations, both receptively and productively.

At the end of each Part, a **STORY** presents the letter-sound combinations that students have learned in a new, entertaining context. Words students have learned in the preceding units are recycled, and new words are introduced to expand students' foundational vocabulary.

Digital Materials

The series comes with a CD-ROM of digital learning tools to make classes easier to run for teachers and more dynamic and engaging for students. In addition to the full audio to accompany the student-book activities, the CD-ROM has many fun, interactive multimedia activities and an assessment for each Part of the book.
