

A photograph of the Space Shuttle Discovery on display in a museum. The shuttle is the central focus, shown from a front-on perspective. It is mounted on a yellow mobile launcher vehicle. The museum's high, arched ceiling with a complex steel truss structure is visible in the background. Various other space-related exhibits, including satellites and smaller spacecraft, are scattered throughout the exhibit space. A person in a purple jacket is visible in the lower-left foreground, looking at an informational display. The lighting is dramatic, with spotlights highlighting the shuttle and creating a blue and white color palette.
